CAR HOIST

Benefits

- Space effective alternative to concrete car park ramps enabling additional parking spaces
- Provides a solution where the site is too small for a conventional car park
- Maximise number of vehicles in car dealership showroom
- Cost effective alternative to a traditional car lift
- Minimal pit & overrun requirements
- Self diagnostic programmable logic control (PLC)
- Low maintenance costs

Options

Standard Hoist (Hoisting the Vehicle Only) Includes:

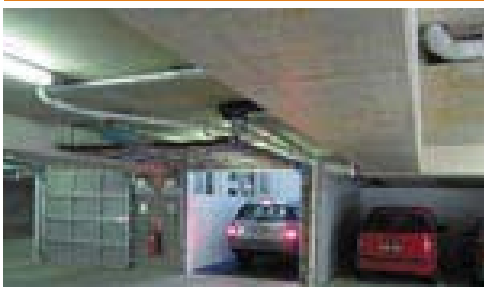

- Finishes - industrial enamel or 2 pack epoxy, stainless steel or aluminium chequer plate etc
- Door with ventilation slots, steel or aluminium, galvanised or powder coated roller shutters or panel lift doors with continuous rated door motors
- Doors opposite sides or same sides
- Additional doors for double entry/exit of hoist
- 2 level, 3 level or 4 level
- Fabricated steel ramp if applicable

Ride-On Hoist (Enabling the driver to remain in vehicle) includes the above & the following options:

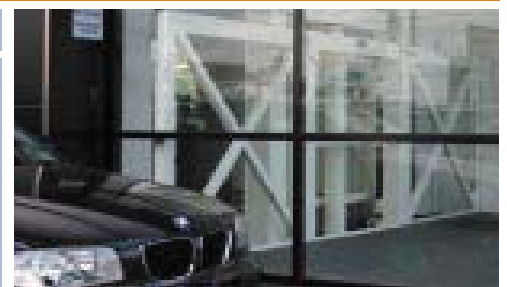

- Walls and roof on platform
- Inside platform control with Emergency exit system
- Remote control feature is added to call hoist to the appropriate level & open door for easy entry
- Emergency telephone
- Emergency back up light

All Southwell hoists exceed the design and safety standard requirements of the Australian Standards and all OH&S regulations
