

Car Hoist

Our car hoists provide a space effective solution where the site is too small for a conventional carpark. Our designs allow the driver to remain in the vehicle while the hoist is in operation and control can be via remote or automatic control. Our flexible design capabilities and local manufacturing means we can provide a variety of platform finishes and other options, including custom designs for special applications.

Features and Benefits

- ✓ Inside platform control
- ✓ Emergency exit system with power backup, telephone and back up light.
- ✓ Vertically opening doors offering clear access for larger cars
- ✓ Scissor mechanism version for applications where shaft width is limited
- ✓ Low maintenance costs
- ✓ Self programmable logic control (PLC)
- ✓ Internal power pack
- ✓ Minimal pit and overrun required
- ✓ Fully Compliant with AS 1418 Parts 1 & 8, AS 5246 Part 1, Classification A6, and all WHS regulations.

Main Dimensions

Model	SCH-6030
Platform L x W	6m x 3m
Capacity	3000kg

Southwell Engineering

Southwell is a proud, family owned company. Since 1945 we've been engineering and manufacturing high-quality hoists and scissor lift products at Camden, New South Wales, delivering and installing them around Australia, New Zealand and the world. We design registered one of the original Australian hoist designs and we've continued to innovate with creations like our Car Lift with Integrated Turntable, adding neatly to our standard range of Car Lifts and Goods Hoists.

Our commitment:

- Reliability
- Built tough
- 100% Australian engineered and manufactured
- Local spare parts
- Service support by our factory-trained technicians
